## **DETAILED ACTION**

### **Status of the Application**

Acknowledgement is made of the Amendment filed 03/04/02.

In view of the addition of new claims 10-36, which adds claims to a variety of specific classes of permeation control layers and a variety of specific classes of medicaments, an election of species is now being required.

### ***Election/Restrictions***

Claim 1 is generic to a plurality of disclosed patentably distinct species comprising a Permeation control layer. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
